Elegant, hygienic and of enduring value

The Medical Stainless Steel Tubs

from Baumbach

Medical stainless steel tubs from Baumbach

For more than 40 years, Baumbach in the German state of Saxony has been producing medical stainless steel tubs.

Our tubs will make a believer out of you with

- their long service life
- their extremely high surface resistance
- the highest hygienic standards.

Wellness resorts, sanatoriums, rehabilitation clinics and hospitals have trusted our carefully crafted quality from Germany for many years.

Technical parameters and equipment:

- Ergonomic shape in the back zone for relaxed lying.
- Two polished stainless steel handles for safely entering and leaving the ends of the bath.
- Approximate capacity 220 litres.
- Polished tub edge for an elegant appearance with fine inside finishing (granulation 240) for maximum hygiene and cleanliness.

baumbach

Made in Germany

What you need is what you get: Install our tub in the middle of your space to be accessible from all sides (compact design). Our height-adjustable tub frame is lined with finely structured stainless steel sheeting. You can also tile our tubs or integrate them into your wellness landscape (supplied with four feet).

We feature two models of Baumbach medical tubs:

tubs for mud treatments • tubs for various types of medicinal waters

Mud tub

external dimensions: 2,250 x 850 x 630 mm high
internal dimensions: 1,685 x 665 x 485 mm high

- 460 mm extended tub edge for mounting fittings and DN 80 shut-off valves with a flange connection
- Side inlet similar to a frog's mouth for warm mud baths
- 3" drain with ball valve
- Option for connecting up heart cooling

Medical tub

external dimensions: 2,020 x 850 x 630 mm high
internal dimensions: 1,685 x 665 x 485 mm high

- 230 mm extended tub edge for mounting modern water filling and gas fittings
- 2" drain connections for fast emptying
- It can be equipped with one oxygen, compressed air or CO₂ valve each wherever requested
